

Efficient. Space-Saving. Precision Handling.

Underslung Crane

TACKLERS' Underslung EOT Cranes (also known as Underhung Cranes) offer an ideal solution for facilities where supporting steelwork beneath the crane is not feasible. These cranes are suspended directly from the roof structure, freeing up valuable floor space and allowing for smooth, unobstructed material flow—perfect for areas with limited headroom or complex layouts.

Engineered for versatility and performance, most Underslung Cranes are of Single Girder design, with Double Girder options also available.

At Tacklers Engineering Pvt. Ltd., our skilled team manufactures a standard yet customizable range of Underslung Cranes to suit various industry requirements.

Applications:

Widely used in industries where a large, clear working area is essential—such as **automotive, aerospace, warehousing, assembly lines**, and **light-to-medium manufacturing** setups.

Specifications:

- **Capacity Range:** 0.25 to 25 Tons
- **Span Range:** Customizable as per project requirements

Some of Our Esteemed Clients

Our Other Verticals:

- Cranes & Hoists
- Floor Handling Equipment
- Mobility Solutions
- Automation & Robotics
- IOT Services
- Annual Maintenance contract
- Crane Kits
- Renewables
