### Brilantor

Unleashing the Unmatched

## Organization Overview

We are a distinguished organization comprising of highly skilled techno - commercial professionals. Our team holds degrees such as M. Tech from MIT USA, M. Tech from IIT Kanpur, PG from IIFT Delhi, B. Tech from IIT Delhi and Ph.D from University of Akron, USA; and boasts extensive industry experience ranging from 14 to 22 years.

## Our Mission

At Eview, we are dedicated to the pursuit of power bill savings and actively contribute to the green revolution by reducing carbon footprints through energy-saving solutions. Our company offers cutting-edge solutions that cater to diverse needs, ensuring optimal Lux levels for Daylighting. We utilise the finest materials sourced globally, guaranteeing a lifespan of 20+ years for our products.

Eview Global boasts a proven track record with

# BRILANTOR

Illuminating Spaces with Brilliance

This system is the pinnacle of daylighting solutions. It stands as the most advanced product in its category, measuring 4000 X 600 X 300 mm ( 157.5 X 23.6 X 11.8 inches ) in length X width X height, along with various sizes and provides up to 3 times the lighting compared to its closest competitor. Featuring over 240 diamond-shaped prismatic lenses, Brilantor ensures exceptional daylight collection. Ideal for non-false ceiling areas, this unique solution incorporates a diffuser with a light channelling design.

## Advantages of using a Daylight Harvesting Brilantor:

### Pain area resolution:

Brilantor addresses the drawbacks of current daylighting models.

### Universal fixing mechanism:

Brilantor comes with a pre-molded, polycarbonate fixing mechanism that ensures no water ingress and accommodates various roof shapes and profiles.

## Uniform light distribution:

The rectangular shape of Brilantor allows for even spread of light along the width and length of the shed, surpassing conventional daylighters.

## Enhanced light impact:

The diamond lenses on the side of Brilantor enhance the light inside the shed uniformly.

## Safety grill compatibility:

Unlike other models, Brilantor allows for the installation of a safety grill at the roof sheet level, as there is no protruding pipe below the roof.

## Wide diffuser opening:

Brilantor's wide diffuser opening of 500 mm x 3350 mm (19.685 X 131.8898 inches) that enables the entry of a large amount of diffused light, covering a greater area than competing products.

## Adjustable dimensions:

Brilantor can be adjusted in terms of length and width to meet specific lighting requirements, making it a highly flexible and unique unit.

## Elimination of common issues:

Brilantor eliminates common problems associated with current daylighting systems, such as leakages, mismatched roof adaptors, dependence on sealants, uneven lighting, and limitations on installing safety grills.

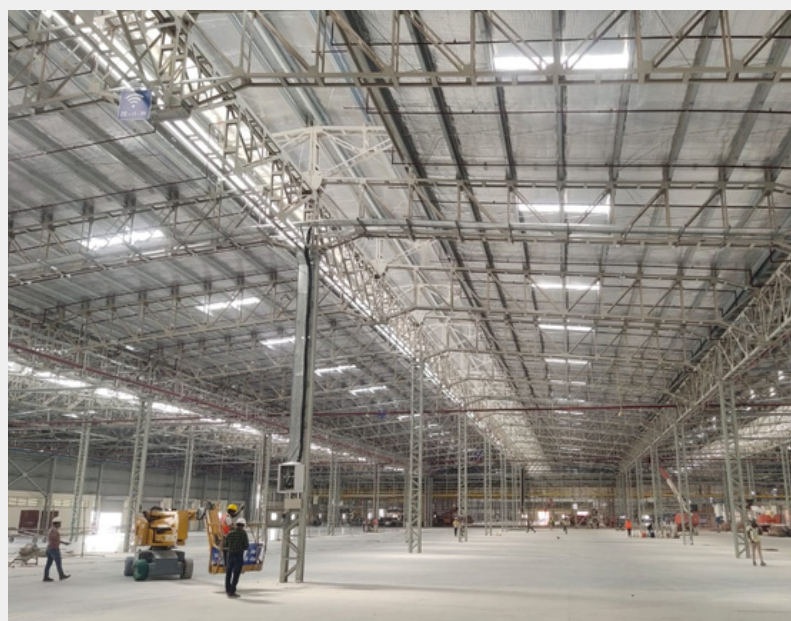

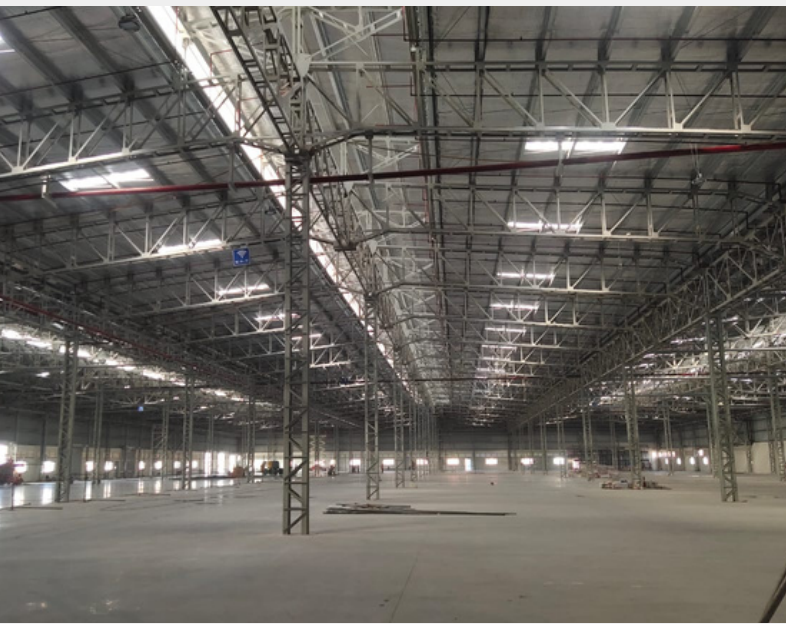

## Reduced concentration of light:

Brilantor minimises the concentration of light below the units, particularly during summer months.

**Overall, Brilantor offers superior performance, flexibility, and resolves various limitations associated with existing daylighting systems.**
