About Us

Aqua star Rainwater Gutters: Redefining Rainwater Management

Backed by the heritage of the Ponnore Group, with over 30 years of experience in PVC pipes and fittings, Aquastar Rainwater Gutters is a pioneer in sustainable rainwater management solutions. We are dedicated to redefining the industry through innovation, quality, and a deep commitment to environmental responsibility.

Our gutters are crafted with industry-leading expertise and embody excellence in quality. This commitment is reflected in our comprehensive 10-year warranty, guaranteeing decades of peak performance from Aquastar.

We don't just offer products, we offer solutions. By combining innovative design with unwavering quality, Aquastar provides reliable rainwater management systems tailored to your specific needs. Choose Aquastar and experience the future of rainwater management, while contributing to a sustainable future.

10^{Years} Warranty

Crafted with enduring materials and backed by an industry-leading warranty exceeding 10 years, Aquastar gutters deliver exceptional value. This comprehensive warranty program reflects our unwavering commitment to quality and ensures your investment is protected for well over a decade.

You can rest assured knowing your Aquastar gutters will perform flawlessly, year after year

With India's vast and varied climate demanding effective rainwater harvesting solutions, Aquastar takes the lead. As the first to introduce UPVC gutters to the nation, we offer a pioneering solution. Engineered specifically to withstand India's unique weather challenges, our UPVC gutters provide a reliable and sustainable rainwater management system.

Committed to a sustainable future, Aquastar crafts its rain gutters and clamps from virgin UPVC. This eco-conscious choice minimizes resource consumption while delivering superior performance. Virgin UPVC boasts enhanced durability and resistance to weathering, ensuring your gutters function flawlessly for years to come.

Unleashing the power of innovation, Aquastar elevates rain gutter design with our patented corrugated and T-square series. Crafted using cutting-edge AI technology, these designs go beyond aesthetics. Our patented features optimize performance and durability, ensuring your Aquastar gutters deliver exceptional performance for decades.

Corrugated Series

CORRUGATED

S E R I E S

AquaStar's Corrugated Series pushes the boundaries of rainwater management with India's first UPVC corrugated design. This innovative approach offers superior strength and increased water storage capacity compared to traditional solutions. Beyond functionality, the corrugated design incorporates aesthetic elements inspired by classic architecture, ensuring seamless integration with both modern and traditional building styles. This unique combination of durability, efficiency, and timeless design makes AquaStar's Corrugated Series a compelling option for homeowners and architects seeking a sustainable and aesthetically pleasing solution for rainwater harvesting.

AquaStar Delta

160 MM, 6 Inch

The AquaStar Delta (6 Inch) Rainwater Gutter is a corrugated-designed rainwater gutter available in lengths of 3 meters and 5 meters. Its reinforced side beading not only enhances strength and durability but also ensures reliable performance even in harsh weather conditions. Available brackets include uPVC, galvanized iron, and inner stainless steel/ uPVC.

AquaStar Rainwater Harvesting System

At AquaStar, we recognize the importance of rainwater harvesting in addressing water scarcity and promoting sustainability. Our Rainwater Harvesting (RWH) system is designed to harness the power of nature efficiently. The system comprises high-quality gutters and down pipes that channel rainwater from rooftops into durable, UV-resistant tanks. Whether you need water for gardening, toilet flushing, or laundry, our RWH system ensures a sustainable supply. By implementing AquaStar's RWH system, you contribute to water conservation and create a greener, more sustainable future.

What Sets Us Apart:

Innovative Design: AquaStar's uPVC Rainwater Harvesting system revolutionized square gutters across India. Our corrugated/ Square gutters are meticulously designed, eliminating imperfections found in other market products.

Leak-Proof Fittings: Our uPVC fittings match the gutter profile, ensuring leak-proof performance.

Easy Installation: Our uPVC Rainwater Harvesting system is designed for easy installation, reflecting AquaStar's commitment to providing convenient solutions for our customers.

AquaGreen - Sustainable Solutions for Every Need:

At Aquastar, we go beyond rainwater harvesting to provide a diverse range of sustainable solutions.

Introducing Aquagreen, our line dedicated to offering safe and eco-friendly solutions for animal husbandry, vertical farming, and pisciculture. With Aquagreen, we're committed to promoting healthier practices for both farming and the environment.

Vertical Farming: Aquagreen's vertical farming solutions are revolutionizing the way we grow food. By utilizing vertical space, we can maximize crop yields while minimizing land use and environmental impact. Our vertical farming systems are designed to be efficient and sustainable, providing fresh and healthy produce year-round.

Animal Husbandry: Aquagreen offers innovative solutions for animal husbandry that prioritize the health and well-being of your livestock. Our products are designed to provide a safe and comfortable environment for animals, promoting their growth and productivity.

Pisciculture: Aquagreen's pisciculture solutions are ideal for those looking to cultivate fish in a safe and eco-friendly manner. Our products are designed to create optimal conditions for fish growth, ensuring healthy and robust fish stocks.

Why AquaStar?

Aquastar Rain Harvest System	Ordinary System
uPVC Material	PVC/ Metal
UV Stabilized	No UV stabilized coatings
Low Cost, Easy to handle & Install	High Cost, difficult to handle & Install
uPVC Brackets	Metal clamps corrode when exposed to rainwater
More strength	Bend faster due to lower strength
Non-Corrosive & Rusting	Metal gutters rust quickly when exposed to rain, which can lead to them being attacked by weeds, and fungus
Large size of the outlet enables easy flow of water	Small outlet that blocks leaves/ waste
No leakage due to custom-made channels and locks	Uses mismatched fittings that can lead to possible leakages
No maintenance	Requires maintenance
10 years warranty	No warranty
