

STOP Losing Productivity on Your Shopfloor!

Is Your Factory Layout Helping You Or Hurting You?

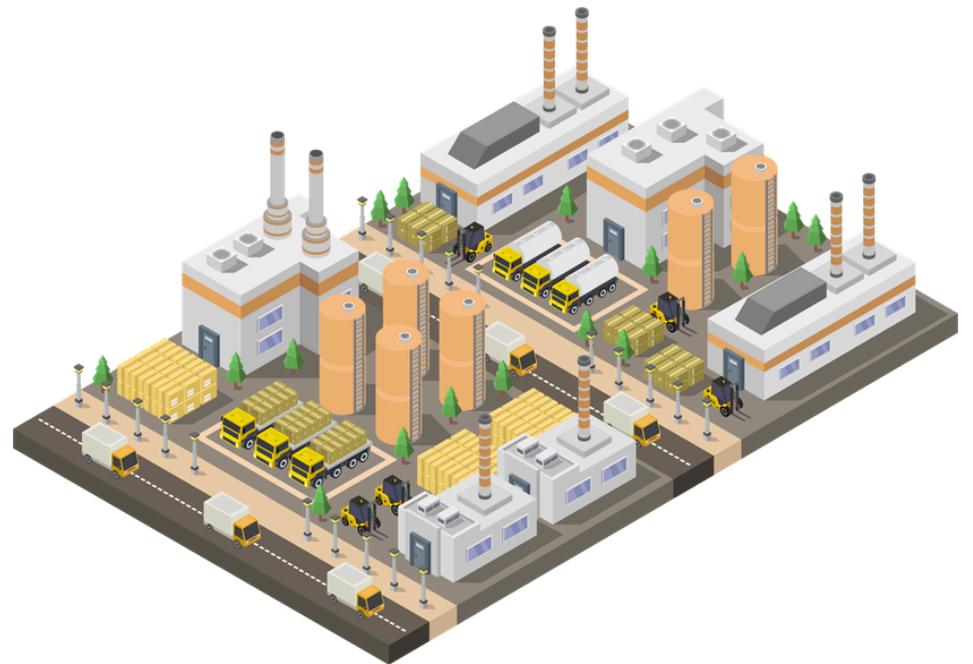

We Design High-Performance Lean Layouts

Most factories don't realize they are losing money due to:

- ✗ **Excess Material Movement**
- ✗ **Poor Line Balancing**
- ✗ **Unnecessary Manpower**
- ✗ **High WIP**
- ✗ **Long Lead Times**
- ✗ **Space Constraints**

Your layout may be your biggest hidden cost

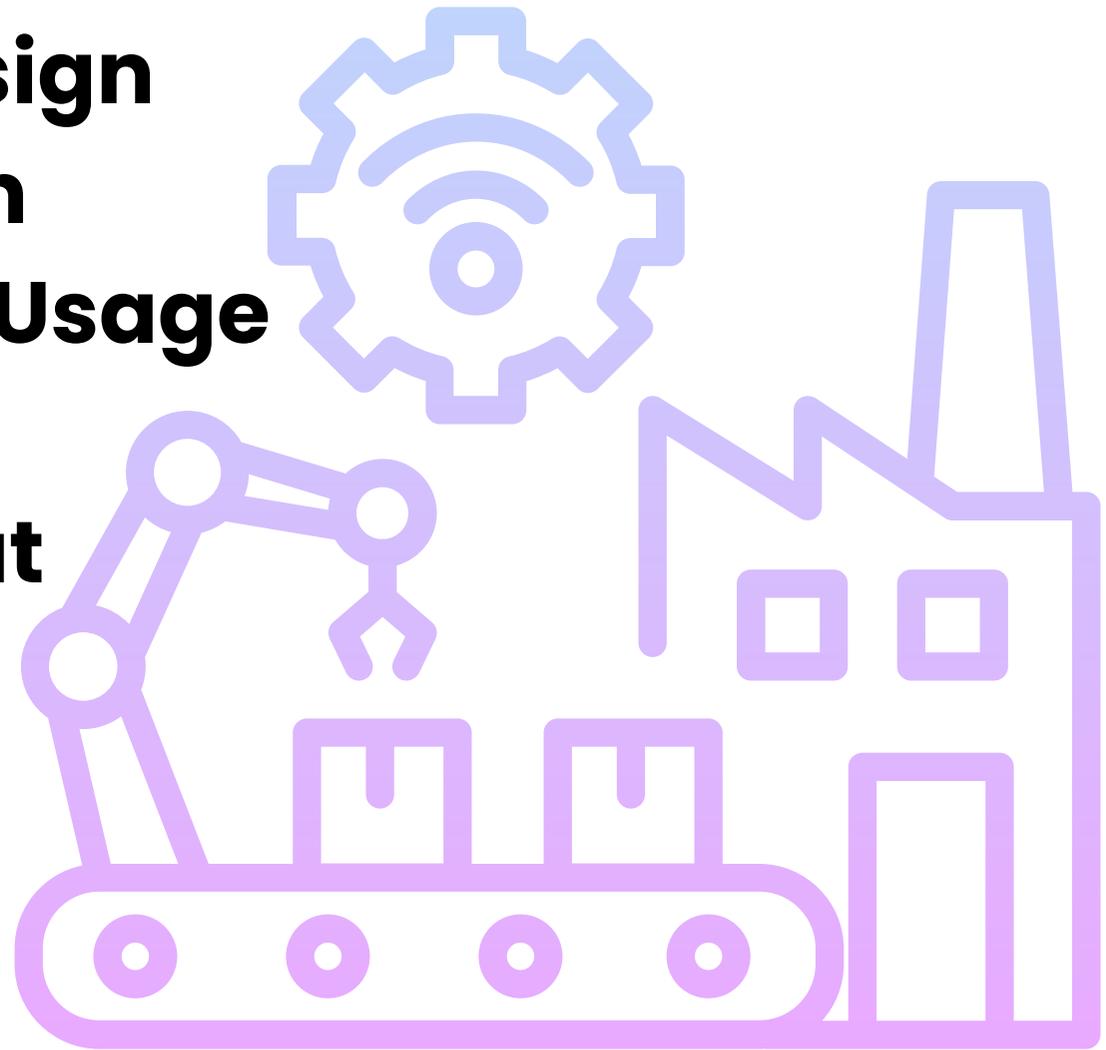

What is a Lean Layout?

A Lean Layout is not shifting machines.

It is:

- ✓ **Strategic Flow Design**
- ✓ **Waste Elimination**
- ✓ **Optimized Space Usage**
- ✓ **Reduced Motion**
- ✓ **Faster Throughput**
- ✓ **Improved Safety**

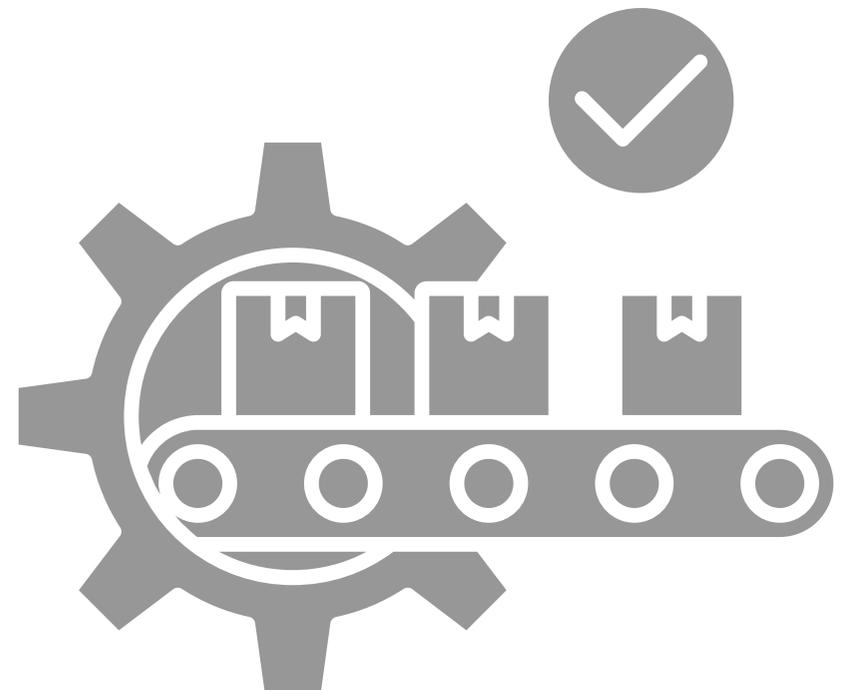

It aligns your factory to Lean Manufacturing principles

With the right Lean Layout, you can achieve:

-  **20–40% Reduction in Material Movement**
-  **15–30% Space Optimization**
-  **Faster Throughput**
-  **Lower Inventory Cost**
-  **Higher Productivity**
-  **Improved OEE**

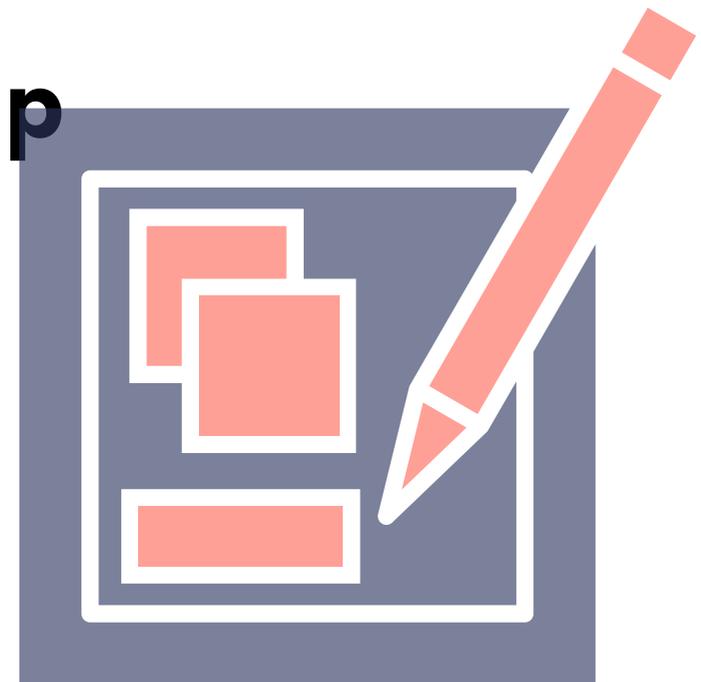

Lean Layout = Higher Profitability

We follow a structured methodology:

Current State Study
Spaghetti Diagram Analysis
Value Stream Mapping
Future State Layout Design
ROI Estimation
Implementation Roadmap
and more....

We design for results — not just drawings

Who Is This For?

-  **Plant Heads**
-  **Factory Owners**
-  **Operations Managers**
-  **Manufacturing Heads**
-  **Industrial Engineers**
-  **MSME Entrepreneurs**

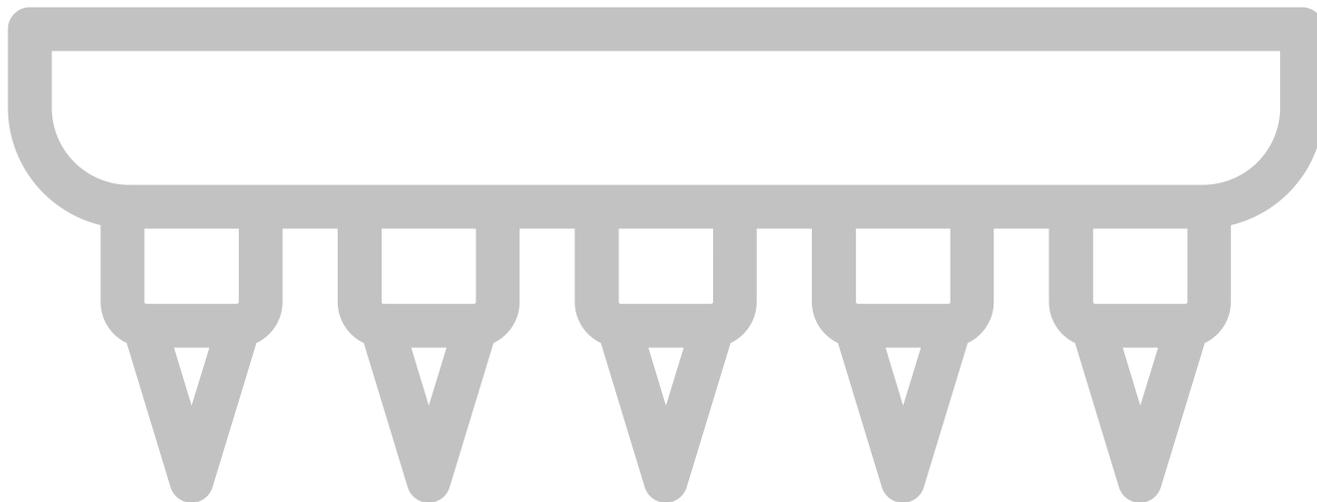

Industries We Serve:

Automotive | Electronics | Pharma | Food | Chemical | Process | Engineering | Warehousing

- ✓ **Setting up a New Plant?**
- ✓ **Expanding Capacity?**
- ✓ **Struggling with Space?**
- ✓ **Want to Improve Productivity Without Investing in New Machines?**

Start with Layout Optimization
