

From Documents to Decisions – Faster, Smarter, Safer.

The Problem

Manual document workflow has limitations

Delay in data processing

Rely on manual entry which is error-prone

Manual review increases cost

Retrieving data is challenging

Sometimes require skilled resources

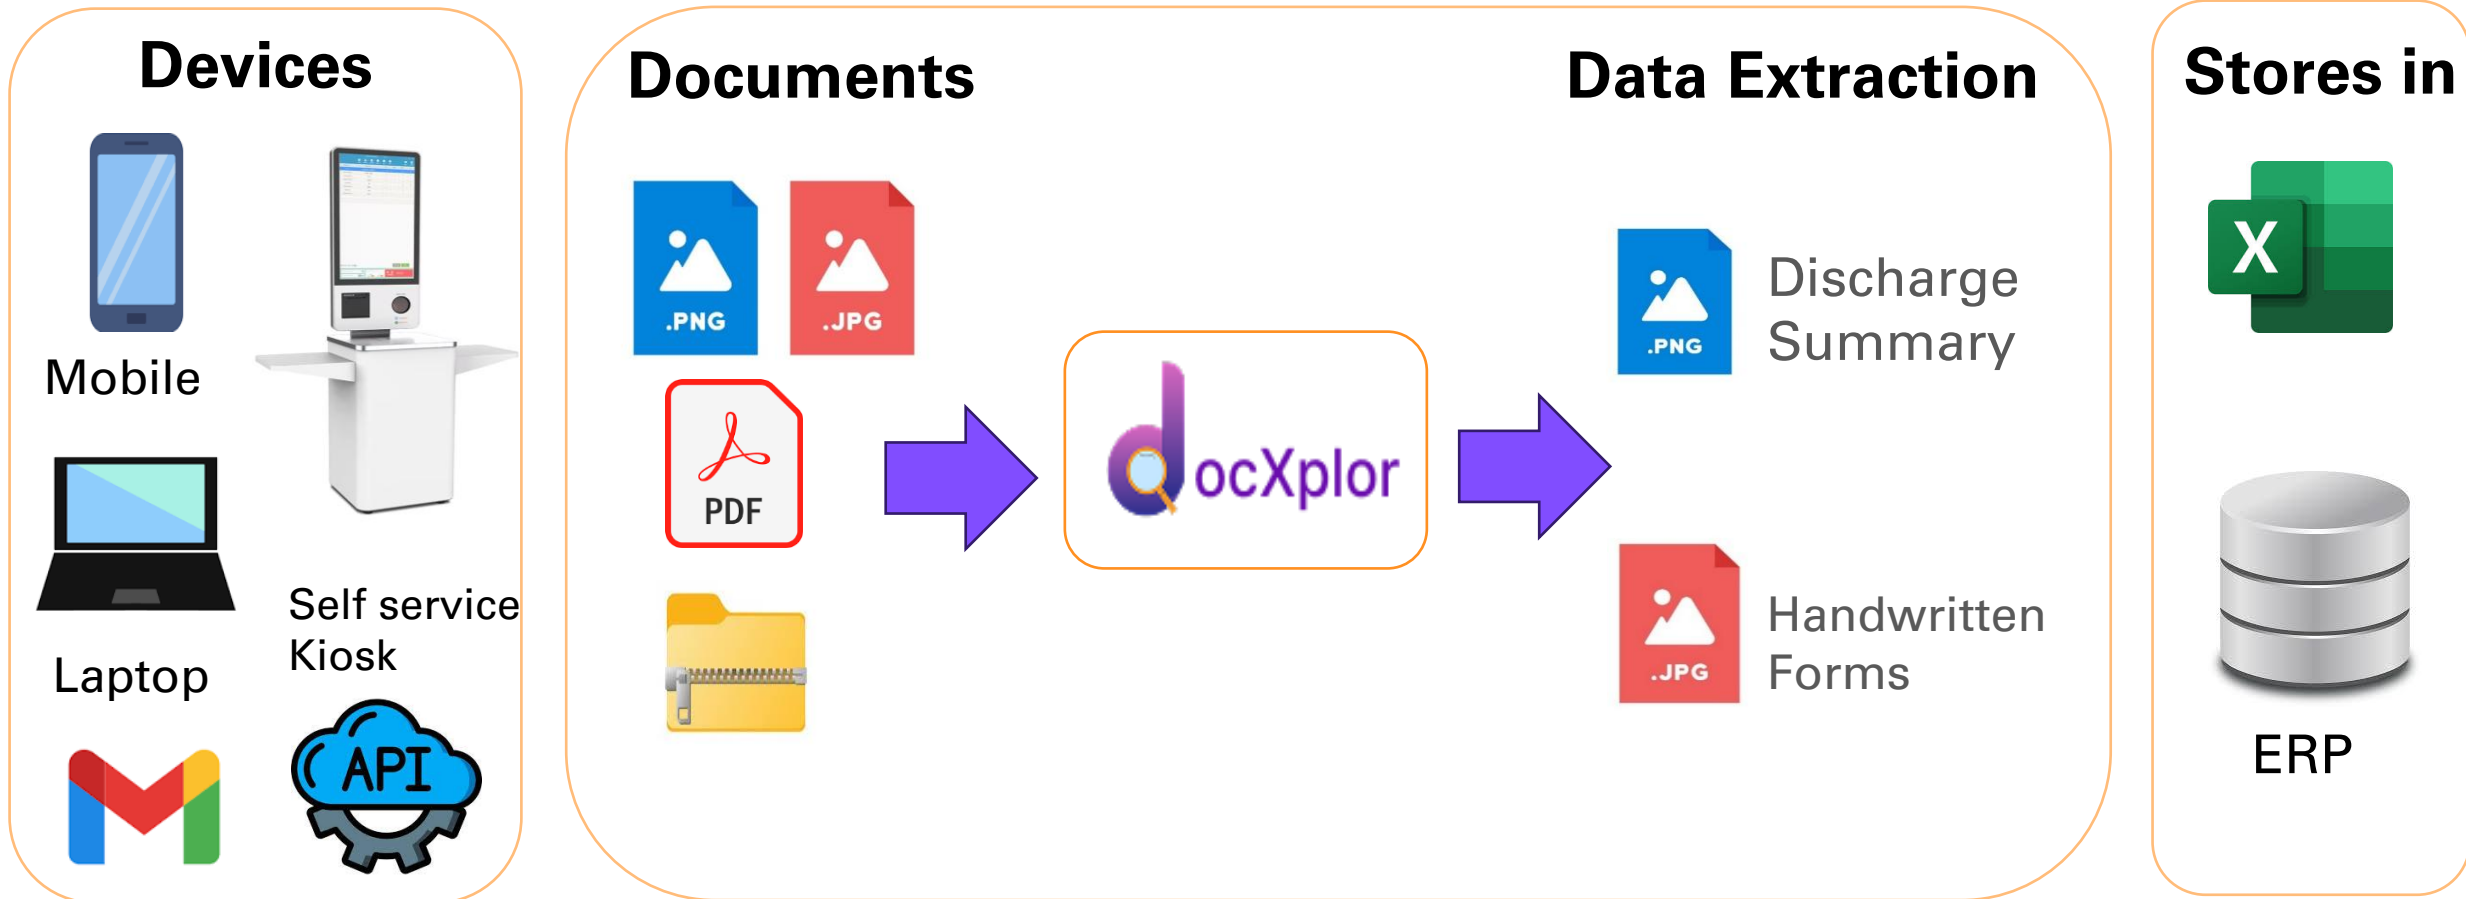

docXplor eliminates these problems in a flash

Lets see how?

docXplor – how it works

DocXplor identifies **type** of various documents automatically and extracts useful information from that document with high accuracy, even for handwritten documents.

Our happy customers

Testimonials

Thanks to Vixplor's application DocXplor, we have automated the vendor invoice workflow. **With over 90% accuracy**, it either extracts data correctly or routes the file for manual review, ensuring no invoice is processed with incorrect information. We are very satisfied with the solution.

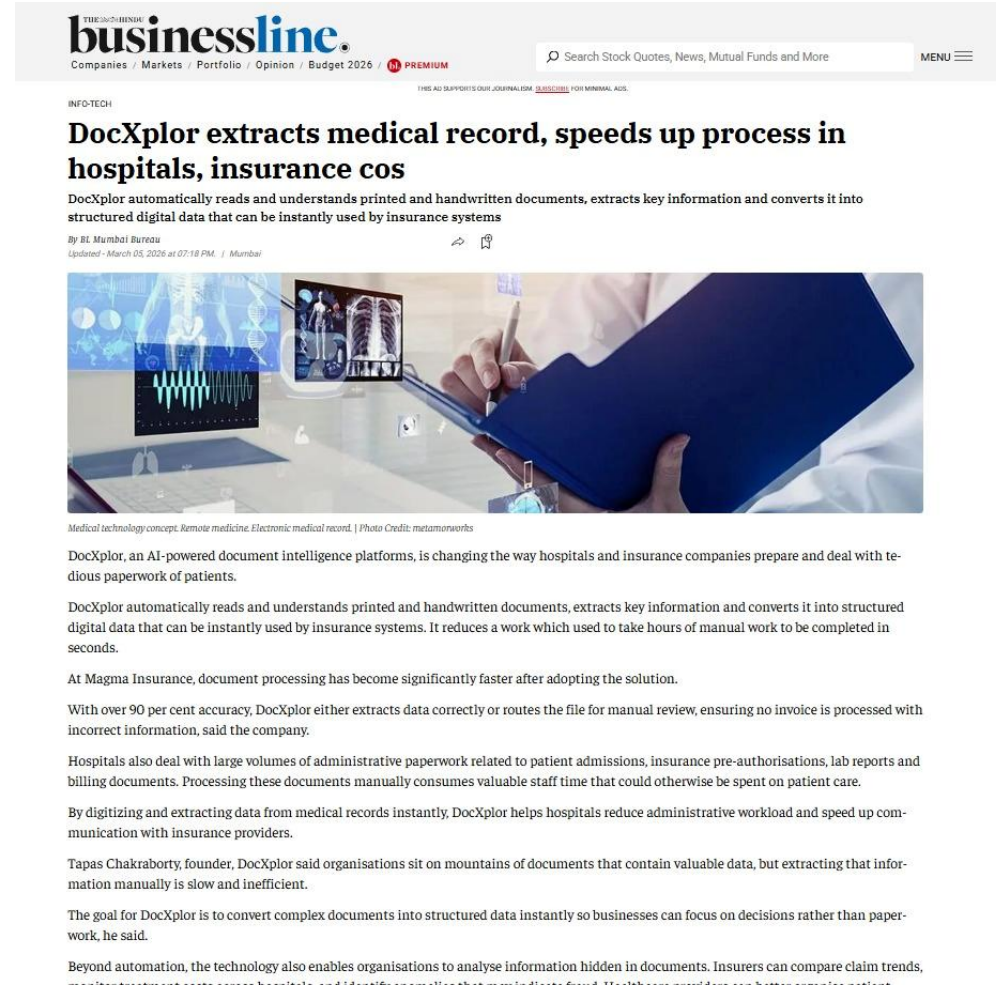

Nitesh Bhardwaj
Sr Manager, Magma

Sanjoy Chatterjee
Director, Entiovi Technologies

We have been using the docXplor API since February 2025 to automate data extraction from purchase orders for one of our manufacturing clients. docXplor accurately captures key fields (PO number, date, items, quantity, and delivery address) and processes over **95% of documents end-to-end without human intervention.**

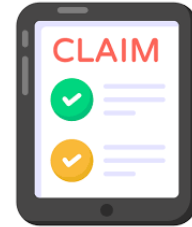

[The Hindu Businessline](https://www.thehindubusinessline.com)

Insurance : use cases

Vendor invoice processing

Automatically fetch invoices from emails, extract data, validate and insert into existing system

Claim processing

Identify individual documents from combined claim files, extract data, validate, and flag discrepancies

www.docXplor.com

Policy issuance

Extract data from govt ID cards, broker quotes and previous policies to issue new policy.

Agent onboarding

Automatically extract data from academic marksheets, regulatory certificates to check eligibility

Bank & NBFCs : use cases

Customer onboarding

Identify and categorize customer documents (KYC, statements, ITRs) extract key fields; validate and push to in-house system

Loan processing

Extract data from documents; validate statements i.e. salary credits, bank balance, analyze expense patterns

www.docXplor.com

Automate cheque processing

Extract data from bank cheques, validate if name, signature etc. matching, and process cheque automatically

Automate trade finance

Auto identify and categorize documents; extract key fields (buyer, seller, shipment, vessel, etc.) Cross-check with internal systems and compliance lists

Healthcare : use cases

Patient admission

automate admission process by extracting and validating data from patient documents (prescriptions, test reports, ID cards)

Rates from agreement

Extract bed charges, Cath lab and surgery packages, discounts from contract and push to ERP for billing

www.docXplor.com

Smart Procurement

Process vendor invoices, purchase orders, and challans. Auto-match quantities, prices, & approvals.

Inter dept communication

Digitize and interpret handwritten notes and instructions exchanged between doctors, nurses, and admin.

Manufacturing : use cases

Order management

captures incoming orders from multiple sources, extract key fields, validate against in-house database and flag discrepancies
