

TrackEZ

**KNOW WHERE YOUR TEAM IS
EVERY AGENT . EVERY MOMENT**

What is TrackEZ

TrackEZ is a GPS-powered workforce tracking application by Maple Software Private Limited that lets organisations monitor on-field activities in real time. It boosts accountability, eliminates manual reporting, and delivers customised dashboards and analytics — on both mobile and desktop, even under poor network conditions.

Technical Specifications

- Platform:** Android KitKat and above
- Maps :** Google Maps Interface
- Tracking :** Global Positioning System (GPS)
- Access :** Mobile & Desktop Web
- Network :** Online & Offline capable

Why Choose TrackEZ?

- **Boost Accountability :** Know exactly where every field agent is — in real time, all day.
- **Eliminate Manual Logs :** Replace paper attendance & activity registers with automated digital reports.
- **Works Offline Too :** No signal? No problem. Data syncs automatically once connectivity returns.
- **Scale Effortlessly :** From 5 agents to 500 — manage any team size from one unified dashboard.

Real-Time GPS Tracking

Track individuals or groups live on Google Maps with pinpoint accuracy.

Offline Resilience

Data stored locally when offline; syncs automatically when connection returns.

Attendance Reports

Auto-generated daily & monthly attendance - no manual registers needed.

Live Dashboard

Instant overview of field workforce status, locations, and activity levels.

Notifications & Messaging

Built-in message workflow and push notifications keep the whole team aligned.

Custom Reports

Activity, device-status, and workforce reports tailored to your operations.

User Role Management

Define roles and permissions to control data access across your organisation.

Mobile & Desktop

Full functionality on Android (KitKat+) smartphones and desktop browsers.
