

**BLASTPOT.....**

## **BLASTPOT.....**

**DESCRIPTION:-** A blast pot, also known as a sandblasting pot, is a pressurized vessel used in abrasive blasting. It holds abrasive materials (like sand, glass beads, or aluminum oxide) and propels them using compressed air to clean, strip paint, or remove rust from surfaces, preparing them for coating or painting.

- 1. ASME/CE CERTIFIED**
- 2. CAPACITY : 10-12000L**
