Visitor Management System

Challenges SMEs Face with Visitor Management

Security Risks

-  Mismanagement of Access Passes
-  Inadequate Visitor Tracking
-  Emergency Response Inefficiencies
-  Lack of Proactive Security Alerts

Data Management and Compliance

-  Data Integrity and Security Challenges
-  No Integration with Other Systems
-  Reporting Challenges

Operational Inefficiencies

-  Manual Check-In
-  Inefficient Allocation of Resources
-  Appointment Mismanagement

Visitor Experience and Satisfaction

-  Inability to Track Visitor Feedback
-  Confusion and Reputation Damage

Solutions We Deliver

Secure Digital Data

OTP-verified, encrypted storage, compliant with data protection laws.

Seamless Check Ins

Swift check ins with less than 20 seconds

Emergency Alerts

Real-time notifications for visitor safety.

Data Analytics

Actionable insights for decision-making.

System Integrations

Seamless integration with existing business systems.

Identity Verification

Verify Aadhar Number of all visitors

Group Visits

Fast, contactless group check-ins.

Appointment scheduling

Streamlined appointments.

Invite VIP/Guest

Express check in for VIP/Guest through invite check in

Safety Instruction

Add safety guidelines, videos that adheres to visitor policy

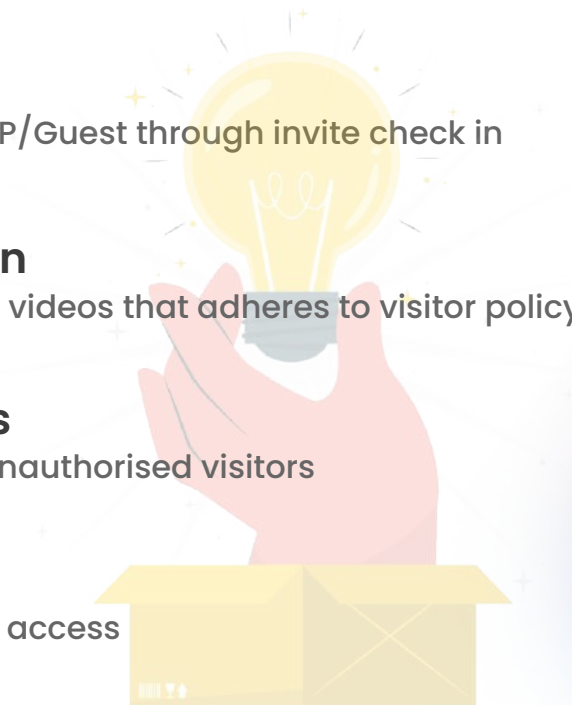

Black List visitors

Restrict trespassers, unauthorised visitors

Single Sign On

Simplify host & admin access

Visitor Management System

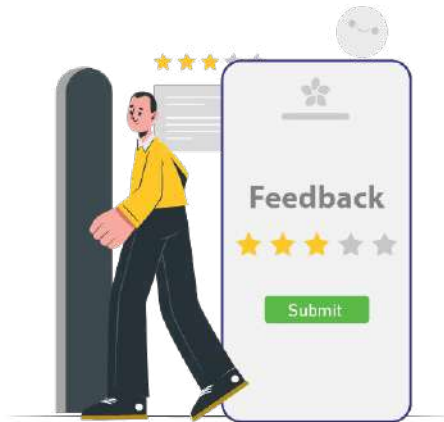

1. Simplify check-ins with a quick QR code scan

2. Mobile/Adhar Verification

3. Capture visitor details digitally, customized safety instructions for seamless processing

4. Hosts can approve or reject visitor requests in real time

7. Maintain accurate visitor logs automated checkout and meeting feedback request

6. Facilitate meetings with scheduled check-ins

5. Issue secure digital passes for authorized access

Visitorz.io

Parcel Management System

Challenges SMEs Face with Parcel Management

Manual Tracking & Record Keeping

 Manual methods to track incoming and outgoing parcels.

 This leads to inaccuracies, time taking data entry, and difficulty in analyzing trends.

Time-Consuming Processes

 Manual processes like signing for deliveries, notifying recipients, and managing pickups can be time-consuming for employees

 Reporting Challenges

Lack of Visibility & Control

 Limited visibility into the entire parcel journey.

 Difficulty in tracking shipments in real-time, leading to delays in delivery and customer dissatisfaction

Communication Challenges

 Inefficient communication with couriers and recipients can lead to delays, confusion, and missed deliveries.

 Confusion and Reputation Damage

Solutions We Deliver

Easy Parcel Tracking

Provide Real-time tracking of all incoming and outgoing parcels

Detailed Reporting & Analytics

Generate comprehensive reports on parcel activity, including volume, delivery times, and costs.

Enhanced Security & Safety

Ensure accountability and transparency in the entire parcel handling process.

User-Based Access Control

Enhance security and prevent unauthorized access to parcel information.

Timely Notifications to Employees

Automated notifications via email or SMS to recipients upon parcel arrival.

Increased Operational Efficiency

Automat workflows for receiving, tracking, and delivering parcels.

Improved Customer Satisfaction

Faster and more reliable delivery of parcels to employees and other recipients.

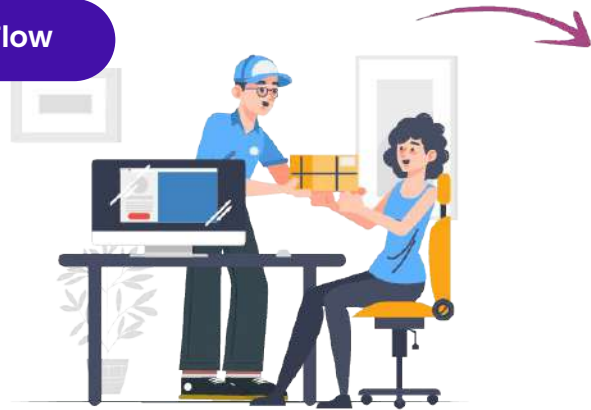

Security Compliances

Ensure compliance with industry regulations for data security and privacy related to parcel handling and delivery.

Parcel Management System

Inward Flow

1. Parcel Arrived & Received at Desk

2. Inform to employee via Parcel Management System

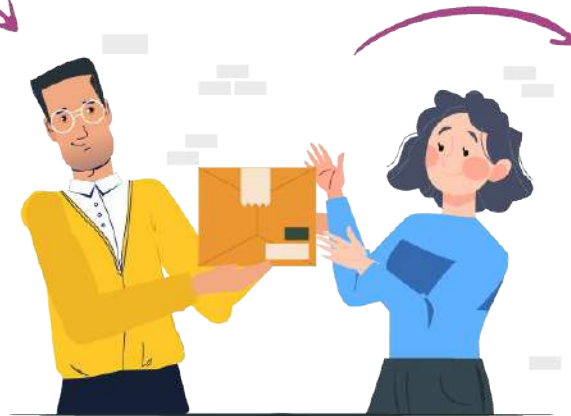

3. Parcel picked up by employee from Desk

Outward Flow

1. Employee add parcel pickup request in Parcel Management System

2. Parcel handover by employee to desk person

3. All parcel handover to parcel vendor for shipment

Event Management System

Challenges Businesses Face with Event Management

Managing Multiple Guests Categories

-  Difficulty in inviting 500+ guests quickly
-  Unable to manage multiple categories for guests

Verifying Guests

-  Unable to find who has registered for the event
-  Can't know if all who registered have arrived

Sending Messages Automatically

-  Can't schedule automatic reminders for events
-  Unable to send thank you messages to all guests

Solutions We Deliver

Easily Invite Guests

Invite guests by importing data

Find Who Has Registered

Know who has registered for the event

Send Reminders

Schedule reminder messages for guests

Create Multiple Categories

Create categories catering to different kinds of visitors

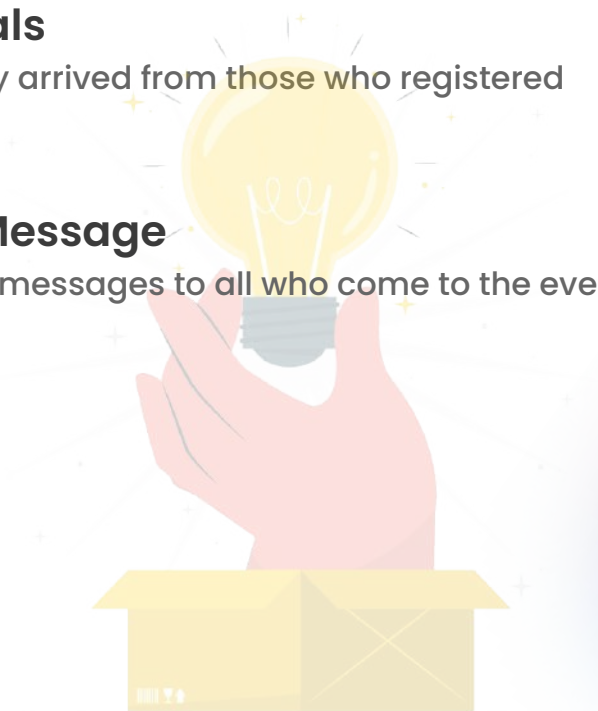

Verify Arrivals

Know how many arrived from those who registered

Post Event Message

Send thank you messages to all who come to the event

Event Management System

Pre-Registration Flow

1. Advance registration through link

2. Verify OTP & submit the registration form

3. Get E-Gate pass on WhatsApp

6. Have a seamless visit throughout the event

5. Collect physical badge

4. Verify E-Gate pass through KIOSK

Visitor Desk

The screenshot displays the 'Visitor Desk' interface. At the top, there is a search bar with 'All Premises' selected. Below this, three summary cards are shown: 'Today Visit' with 26 visitors (a 2.45% decrease from yesterday), 'Today Appointment' with 06 appointments (a 0.40% increase from yesterday), and 'Today Check-In' with 12 check-ins (a 0.80% decrease from yesterday). Below the summary cards, there are two tabs: 'Appointment' (with 3 notifications) and 'Spot Check-In' (with 1 notification). A search bar and a 'Type: All' dropdown are present above the main table. The table lists visitor details including Name, Mobile, Type, Purpose, Date, Appointment, and Check-In status.

Name	Mobile	Type	Purpose	Date	Appointment	Check-In
Sids Mundrakar	83060 XXXXX	Appointment	Meeting	Thu 26 May, 2022	Punit Gajera 11:50 am	-
Deepak Patel	58060 XXXXX	Appointment	Visit	Thu 26 May, 2022	-	-
