

Crescenza Consulting Group

(CCG)

Digital transformation and engineering consulting partner connecting product, plant, process, applications, data, and AI to deliver measurable enterprise outcomes.

About the Company

Crescenza Consulting Group (CCG) helps enterprises modernize applications, connect engineering and manufacturing systems, automate industrial operations, unlock data and AI, and sustain mission-critical digital platforms. CCG combines consulting, engineering, implementation, integration, quality assurance, and managed support to move clients from strategy and proof-of-concept through deployment and continuous improvement.

Company Facts

Acronym	CCG
Year Established	2020
Number of Employees	175
CIN No.	U72900AP2020PTC116557
Registered Office Address	Crescenza Consulting Private Limited, 86-02-09/101, Sangeetam Venkat Reddy Street, Vadrevu Nagar, Danavaipeta, East Godavari, Rajahmundry (Urban), Andhra Pradesh, India, 533103

- Computer & IT Solutions

Logo

Why CCG

- **End-to-end execution:** advisory, architecture, implementation, integration, testing, deployment, support, and continuous improvement.
- **Cross-domain capability** spanning enterprise IT, engineering/PLM, shopfloor/OT, data platforms, analytics, and AI.
- **Tailored delivery models** designed around client processes rather than one-size-fits-all packages.
- **Modernization expertise** across legacy applications, low-code, cloud-native architectures, APIs, automation, and enterprise data.
- **Quality and security orientation;** SOC 2 Type II and ISO 27001 compliance.

CCG Service Families for CII Marketplace

#	Service Family	Primary Buyer Need	Core Platforms / Themes
01	AI Transformation & Enterprise AI Solutions	AI adoption and intelligent automation	Azure AI, GenAI, RAG, ML, Mendix, Graph Studio, AI Studio, Intelligent Center X
02	Custom Application Development & Modernization	Purpose-built software and modernization	Full-stack, cloud-native, APIs, DevOps
03	Low-Code & Rapid Application Development	Faster app delivery and process digitization	Mendix, Power Platform, ThingWorx
04	Product Lifecycle Management (PLM) & Digital Engineering	Connected product lifecycle and engineering data	Teamcenter, Windchill, integrations
05	Industrial Automation & Smart Manufacturing	Connected shopfloor and smart manufacturing	Ignition, MES, IIoT, OEE
06	Enterprise Integration, API & Process Orchestration	Connected enterprise systems and workflows	APIs, microservices, iPaaS, ETL
07	Data Engineering, Business Intelligence & Advanced Analytics	Trusted data, dashboards and analytics	Power BI, Azure, Snowflake, ML
08	Software Quality Assurance & Test Automation	Release quality and test automation	QA, automation, performance, security
09	Application Maintenance, Support & Continuous Improvement	Application reliability and continuous support	AMS, monitoring, enhancements, security
10	Digital Transformation Advisory, Strategy & Risk	Transformation roadmap and risk reduction	Strategy, assessment, planning, change
