ONE OF THE
LARGEST CAPACITY

PRODUCTION CAPACITY

The factory is one of the biggest in the Indian continent, with a high production capacity. It has two fully mechanized units for marble processing, lab, tiles of all sizes and thickness. Massive slabs of marbles are cut into required sizes and polished with sophisticated equipment to lend a superior finish. Slabs are cut and polished by a highly trained staff to achieve the maximum gloss.

FULL BRETON MULTI-WIRE PLANT

Aravali Group proudly introduces the Full Breton Multi-Wire Plant, a milestone in advanced stone processing technology.

Engineered for superior precision, higher productivity and consistent quality, this world-class infrastructure enhances cutting accuracy while maximizing efficiency and material optimization.

INDIA'S 1ST AI-DRIVEN THIN-WIRE PLANT

Aravali Group unveils India's first AI-Driven Thin-Wire Plant, bringing intelligent automation to the future of stone processing.

Powered by advanced AI technology, the plant ensures ultra-precision cutting, optimized performance, reduced material wastage and unmatched consistency aligned with global manufacturing standards.

Mahaveer Trading Company was started by Mr. M.L. Lunawath for his vision to cater the soap, detergent, cosmetic, pharmaceutical, paper and paints industries and today he runs the deepest manual underground mines of India. The soap stone mines is located in Khandel ki pal, near Salumber district in Rajasthan has a depth of 200 meters. The mines has a total capacity of providing with 200 tonnes of soap stone & dolomite in a day with full capacity. The MTC factory has a capacity of producing 150 tonnes of soap stone powder in a day productiony which is then supplied to a variety of different industries. The group has a total of three soap stone units all equipped with ball mills and various other technologies.
